The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/707,793	<b>Applicant(s)</b> WARREN ET AL.	
	<b>Examiner</b> Zohreh A. Fay	<b>Art Unit</b> 1618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Claims 12-27 are presented for examination.

The response to the restriction requirement of June 29, 2007 has been received and entered.

Applicant elected Group II, claims 12-27, without traverse for examination purpose.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1618

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 12-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lloyd et al. (U.S. Patent 6,579,276) in view of WO 01/0191853.

Lloyd et al. teach an ocular iontophoretic device for delivering an aptamer to an affected area of a living being's eye, comprising a reservoir, a matrix capable of retaining a solution having an aptamer, an electrode assembly and a counter electrode assembly. See column 2, lines 53-67. WO Patent teaches the use of an iontophoretic device for delivering different medications to the body. See the abstract, page 2, lines 27-33 and pages 3-6. The primary reference differs from the claimed invention in the delivery of different drugs. It would have been obvious to a person skilled in the art to use the device of primary reference for delivery of different drugs, such as anti-cancer drugs, motivated by the teachings of WO Patent, which teaches the use of an iontophoretic device for delivery of different medicaments to different parts of the body as old and well known.

One skilled in the art would have been motivated to combine the teachings of the above references, since one relates to the use of the claimed device for delivery of an aptamer into the eye, and the other relates to the use of an iontophoretic device for delivery of different medicament as old and well known. Applicant has presented no evidence to establish the unexpected and unobvious nature of the claimed invention, and as such, claims 12-27 are properly rejected under 35 U.S.C. 103.
